Youssef Tijani

Software Engineer

+212713989545 youssef.tijani@outlook.com youssef-tijani ytijani

Summary

Software Engineer with hands-on experience building full-stack applications and AI-powered features across freelance projects and a software engineering internship. Experienced with Next.js, FastAPI, PostgreSQL, and LangChain, with a focus on maintainable systems and practical business solutions.

Technical Skills

- **Languages & Frontend**: Python, TypeScript, JavaScript, C/C++, React, Next.js, Tailwind CSS, shadcn/ui
- **Backend & Data**: FastAPI, Node.js, REST APIs, GraphQL, WebSockets, PostgreSQL, Docker
- **AI / Tools**: LangGraph, LangChain, RAG, LLM Integration, Git, GitHub, Nginx

Experience

Freelance Software Engineer Oct 2025 – Present
Next.js, FastAPI, REST APIs, LangChain, AI/LLM Integrations, WebSockets *Remote*

- Built full-stack SaaS applications using Next.js and FastAPI, translating business requirements into production-ready features across multiple client projects.
- Integrated AI/LLM capabilities using LangChain to develop document intelligence features and contextual AI assistants.
- Designed and implemented backend modules for POS, inventory, procurement, and sales workflows, integrating REST APIs and WebSocket services to support real-time business operations.

Frontend Developer Intern – Leet Alumni Platform Nov 2024 – June 2025
Next.js, Tailwind CSS, shadcn/ui, RTK Query, REST APIs, JWT, WebSockets *Onsite*

- Built scalable frontend features with Next.js and WebSockets, enabling real-time messaging and interactive user experiences.
- Implemented RTK Query caching, pagination, and list virtualization to efficiently handle large datasets and improve application performance.
- Developed reusable and accessible UI components using shadcn/ui and Tailwind CSS, while collaborating with backend engineers to refine API design and ensure seamless integration.

Projects

Sales & Inventory AI Analyst | *LangGraph, LangChain, Python*

- Built a **LangGraph**-based AI analyst that investigates natural-language sales and inventory questions and generates SQL for data analysis.
- Developed a sandboxed validation layer enforcing read-only access and restricting tables, columns, and query limits to prevent unsafe or unauthorized queries.
- Designed the agent to investigate sales by product and branch, check inventory levels, and turn query results into clear business insights.

Custom HTTP/1.1 Web Server | *C/C++, OOP*

- Implemented a custom HTTP/1.1 web server from scratch using object-oriented design principles.
- Designed modular request handling and efficient header processing to strengthen understanding of web server internals.

Education

1337 Coding School (42 Network) Jan 2021 – Present
Peer-to-Peer Software Engineering Program *Benguerir, Morocco*

- Coursework: Data Structures & Algorithms, Problem Solving, Software Design & Implementation, Web Development, Object-Oriented Programming

Language

- **English**: Professional
- **Arabic**: Native
